## PROFILE SUMMARY

Visionary Full Stack AI Engineer with expertise in autonomous systems, cloud-native architecture, and LLMs. I specialize in creating intelligent systems and high-conversion platforms. Seeking partnerships with innovative clients to develop next-gen AI solutions and future-proof infrastructures.

## EDUCATION

2019 - 2022

PIAIC

- Cloud Native & Mobile Web Computing

2023 - Present

PANAVERSITY

- Certified Agentic & Robotic AI Engineer

## WORK EXPERIENCE

Achroweb Solutions

2023 - PRESENT

Full Stack Engineer & Lead Developer

- Architected and shipped end-to-end AI-powered web platforms using Next.js, Supabase, and OpenAI integrations for seamless automation and user personalization.
- Launched production-grade agentic pipelines with LangGraph and FastAPI, driving intelligent task execution and scalable infrastructure in cloud-native environments.

TFTSOL

2020 - 2023

SaaS Engineer & Tech Architect

- Led backend systems engineering for AI-enabled SaaS platforms with robust API ecosystems, asynchronous workflows, and distributed data pipelines.
- Oversaw the development of AI-driven features across platforms, coordinating with developers and stakeholders to maintain seamless product functionality and technical consistency.

Level Up Tech Studios

2019 - 2021

Tech Strategist & UI Innovator

- Delivered modern, responsive UI systems with React, Tailwind, and real-time API integration to streamline digital experiences and reduce front-end latency.
- Implemented SEO-first architecture with Next.js and micro-interactions, improving discoverability, user retention, and technical scalability across web assets.
